12. Heavy rains or snow would be this for automobile drivers: \_\_\_\_\_

**FILL-IN-THE-BLANK:** Read the sentence. Choose the vocabulary word that best goes in the blank space provided.

13. Life expectancy numbers have changed quite a bit since the early 1900's. Life expectancy was only 47 years in 1900 and in 2006 it was up to 78 years for U.S. citizens. The reason for this dramatic change is largely due to the reduction in children dying under age 10. For example, in the year 1900, of every 1000 births, 140 ended with the death of the baby. In the year 2000, there were only about 7 baby deaths per 1000 births. Having more deaths at birth greatly lowers the life expectancy number. Deaths in many childhood diseases also declined after improvements in sanitation and the invention of the flush toilet. Therefore, to be accurate, life expectancy is not truly how long you can expect to live, but rather, a \_\_\_\_\_ number determined by averaging the ages of everyone who has died.
